Report ID:	SVR-2025-0041	Visit Type:	Routine Monitoring Visit
Protocol:	NGX-2201-Ph2	Visit Date:	April 2, 2025
Site ID:	SITE-001	Monitor:	Jennifer Caldwell, CRA II
Site Name:	Dallas Research Institute, Dallas, TX		
Subjects Enrolled:	18	Subjects Active:	14

1. Purpose & Scope

This Site Visit Report documents findings from the Routine Monitoring Visit conducted at Dallas Research Institute, Dallas, TX (SITE-001) on April 2, 2025 for Protocol NGX-2201-Ph2 sponsored by Nexagen Therapeutics. The visit was conducted in accordance with ICH E6(R2) Good Clinical Practice guidelines and applicable regulatory requirements. Areas reviewed included informed consent, eCRF completeness, investigational product accountability, regulatory documentation, adverse event reporting, and source document verification.

2. Visit Summary

Finding Severity	Count	Finding Status	Count
Critical	1	Open	2
Major	1	In Progress	0
Minor	1	Closed	1
TOTAL	3	TOTAL	3

3. Findings Detail

Finding 1 of 3 | Critical | Status: Open

Investigational product storage temperature log shows a 4-hour excursion on 14-Mar-2025 (recorded high: 28.3°C, acceptable range: 2–8°C). No CAPA has been initiated. IP stability must be evaluated by the sponsor.

Finding 2 of 3 | Major | Status: Open

The delegation log has not been updated to reflect the addition of a new sub-investigator (Dr. Patricia Nguyen) who has been performing study procedures since 01-Feb-2025. Training records are also absent.

Finding 3 of 3 | Minor | Status: Closed

An adverse event (mild nausea, onset 22-Mar-2025) for subject 003 was not entered into the eCRF within the required 24-hour window. The event was recorded 5 days after the subject reported it to site staff.
