

SITE VISIT REPORT

Clinical Monitoring — Orion BioPharma

Report ID:	SVR-2025-0085	Visit Type:	Routine Monitoring Visit
Protocol:	OBP-4410-Ph3	Visit Date:	May 1, 2025
Site ID:	SITE-005	Monitor:	Amanda Torres, CRA II
Site Name:	Sunbelt Clinical Studies, Phoenix, AZ		
Subjects Enrolled:	25	Subjects Active:	21

1. Purpose & Scope

This Site Visit Report documents findings from the Routine Monitoring Visit conducted at Sunbelt Clinical Studies, Phoenix, AZ (SITE-005) on May 1, 2025 for Protocol OBP-4410-Ph3 sponsored by Orion BioPharma. The visit was conducted in accordance with ICH E6(R2) Good Clinical Practice guidelines and applicable regulatory requirements. Areas reviewed included informed consent, eCRF completeness, investigational product accountability, regulatory documentation, adverse event reporting, and source document verification.

2. Visit Summary

Finding Severity	Count	Finding Status	Count
Critical	2	Open	2
Major	1	In Progress	1
Minor	1	Closed	1
TOTAL	4	TOTAL	4

3. Findings Detail

Finding 1 of 4 | Major | Status: Open

Informed consent forms for subjects 004 and 009 were signed after the screening visit procedures had already begun. The ICF must be obtained prior to any study-related procedures per protocol section 6.1.

Finding 2 of 4 | Critical | Status: Open

Investigational product storage temperature log shows a 4-hour excursion on 14-Mar-2025 (recorded high: 28.3°C, acceptable range: 2–8°C). No CAPA has been initiated. IP stability must be evaluated by the sponsor.

Finding 3 of 4 | Critical | Status: In Progress

IRB approval letter for the current protocol amendment (v3.1) was not present in the regulatory binder. The amendment was implemented on 10-Jan-2025; IRB approval must precede implementation.

Finding 4 of 4 | Minor | Status: Closed

An adverse event (mild nausea, onset 22-Mar-2025) for subject 003 was not entered into the eCRF within the required 24-hour window. The event was recorded 5 days after the subject reported it to site staff.
